

ClearPaaS (printing as a service)

Savings Average: 35%

The print industry wants you to lease, or buy, new equipment every few years. You don't have to do that with Tryon Clear View Group's new ClearPaaS (printing as a service) program. Just pay for what you print with no hidden fees.

→ The ClearPaaS (printing as a service) program includes all-new standardized equipment, service, and supplies.

→ There is no more buying or leasing of copiers, nor hidden charges— only pay for what you print.

→ There are no up-front costs, print volume minimums, fixed asset costs, or peripheral expenses (toner and service are included in the program).

→ The ClearPaaS program does not have cancellation penalties, does have easy equipment changes, and the customer can select any brand.

→ The ClearPaaS program is exclusive to Tryon Clear View Group customers!

Tryon Clear View Group will prepare and present a detailed Findings and Recommendations report. We will not act on recommendations without full approval from our client. All recommendations can be customized to your needs. Our fee is contingent upon savings found, and approved, for implementation.

Success Story

At a 25 bed hospital, our ClearPaaS program was able to provide new equipment valued at \$250,000, at no cost to the hospital (a very significant cost avoidance in and of itself), and an ongoing saving \$13,443 per month in managed print operating costs.
